ATC: Automated Reissue TST (TQR) History Display

ATC users can now display the TQR history which shows all TST history elements related to ATC reissues performed on a ticket.

It allows agents to get more traceability and track TST reissue activity history for their different analysis needs.

An overview of TQR

- The TST History (cryptic command TTH) contains additions, modifications or deletions since the TST was originally created.
- With this enhancement, when ATC creates the TST (and after EOT – End of Transaction), the TQR (Automated Reissue TST containing detailed reissue related information) is copied into the TST history.

Illustration:

Agent needs to change the departure date and RBD in the following ticket:

```

TKT-0753220933045          RCI-          1A  LOC-63CJ78
OD-MADPAR  SI-          FCMI-0  POI-MAD  DOI-08MAR13  IOI-00185555

/FC MAD 1A PAR885.00NUC885.00BND ROEO.801126
FB 55 CHGS AND REF PERMITTED
FP CASH

```

The agent makes the requested changes into the PNR and calls ATC (FXQ cryptic command) in order to reprice and reissue the ticket:
