

**CHANGE IN TST INDICATOR WITH MANUAL UPDATE OF TOUR CODE (FT)
ON PUBLIC AND PRIVATE FARES**

We wish to share update about the change in TST indicator when the tour code is added or modified manually on auto-priced Public and Private Fares in FT Element.

Overview:

A Tour Code on a flight ticket is a special code arranged between the Travel Agency and the Airlines. It indicates discounts or special offers that the travel agency is given by the respective Airlines.

Before:

An agent can manually insert or modify a Tour Code on an automatic Public or Private Fare. Before this update TST pricing and FCPI value remained unchanged as **I 0**.

After:

With this new update, the FCPI value will be changed from **0 to Q**, in order to highlight the manual change in the Tour Code (FT Element).

Illustration:

In the below example, Virgin Atlantic Airline Itinerary is priced with published fare and the Tour Code (FT) is added manually.

After adding the Tour Code manually, the TST indicator FCPI value changed from **0 to Q**:

Pasted below is TST display before adding the Tour Code:
