

AIR ASIA INDIA- LIGHT TICKETING FLOW

Amadeus is glad to announce launch of Light Ticketing capabilities for Air Asia India on LCC smart on 17th Sep 2014. Bookings made on LCC Smart will be fully compatible with the new Light Ticketing work flow to the point of ticket issuance. It will be a seamless transition for existing LCC Smart users as the new cryptic commands and ticketing entries have been efficiently integrated in the background, freeing the user’s from any extra training or commands to switch to the new work flow.

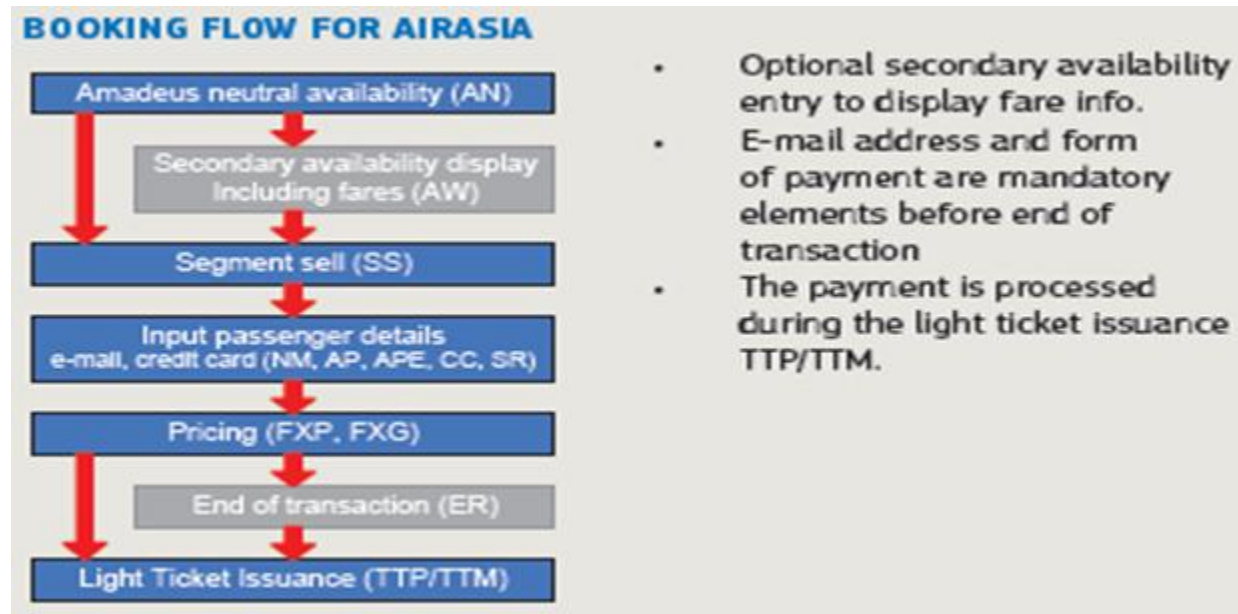

Key Benefits:

- Booking Air Asia becomes as easy and simple as booking a full service carrier no need to learn new commands, it is a seamless flow that follows practically the same steps as the ones to book traditional carrier.
- With direct access to Air Asia's inventory, you will see seats that are available at the time of booking, displayed in Neutral Availability alongside traditional carriers.
- All Mid & Back -office processes will be fully integrated and reliable, and you won't need to spend time on administrative tasks. The light ticketing back-office A.I.R (Amadeus Interface Record) will contain the full PNR information, so that you can fully integrate your Airlines booking in your internal and external reporting. This means you can track your business performance automatically.
