Dear Subscriber,

Microsoft Certificate Handling Patch KB 2661254 – DO NOT DOWNLOAD

Please be advised, on Tuesday, 14th August 2012, Microsoft will be making a new patch available for optional manual download – KB 2661254. Working with Microsoft, we have determined that some Amadeus Users might experience difficulties in accessing our systems if this patch is installed. Accordingly, it is our joint advice that Amadeus Users **do not install** this patch at this time.

Please ensure this message is passed to the relevant team or teams within your organisation. Your regular Amadeus contacts will be able to provide further information if you have any queries regarding this.

We are working with Microsoft to adapt our systems in order that they can work normally with this patch and will let you know proactively when it may be appropriate to install it. You might also wish to communicate with your regular Microsoft contact to discuss the impact of this patch on your own systems environment, and more information is available via a Security Advisory they are issuing.

For any clarification on above, please contact your Amadeus Helpdesk.
