EXPLANATION OF AMADEUS ACCESS LEVELS FOR INFORMATION ON ACCESS AND FUNCTION LEVELS BY AN AIRLINE, REFER TO GG PCA XX	
AMADEUS COMPLETE ACCESS (/)	Amadeus Complete Access gives the highest level of connectivity between an airline and Amadeus, including last-seat availability and immediate confirmation. Example of airlines supporting this feature are BA, AF, The access level is represented by a (/) in the Amadeus availability displays. Note:-But If the airline is not the Altea airline then we can still perform ACL or 1XXad entry if supported by the airline.
AMADEUS ACCESS SELL (.)	Amadeus Access Sell offers a fully secured sale for each seat. When a seat sell request is made, Amadeus checks the flight in the airline's own inventory system. According to the status, the sale is confirmed, waitlisted, or rejected immediately. If the airline confirms the booking at segment sell time, a HK status is returned.The Airline's own record locator is automatically appended to the Amadeus PNR after EOT.If the airline does not confirm the booking, a UC or HL status code is returned. Note: Agents may use direct access to get last seat availability Ex JL
DIRECT ACCESS (DIR) (*)	Direct Access provides a real-time link to the airline's own system to display an accurate availability at the time the request is made. This link is created through the use of Direct Access entries (ACL or 1xxAD entries).This functionality provides last seat availability of the airline on a secondary display. Seats sold on this real time link carry a LK status code. The airline may have the record locator return option supported. It is important that the sell entry be made within 3 minutes of accessing the direct access display.
STANDARD ACCESS	Schedules are updated on a weekly basis.When you book a seat on a standard access airline, the airline may revert with the confirmation or rejection of sale within 12 hours. If the airline supports Record Return option, its own record locator is appended to the PNR. Seats sold are in SS status code.

AMADEUS TICKETLESS ACCESS (-)	Amadeus Ticketless Access is a new type of access that enables end users to get availability and schedules from the low cost carriers in the Amadeus principal displays. Ticketless Airlines are identified by a ' - ' in the Access indicator field and by the letter "Y" in the Ticketless Access field of the carrier's GG PCA page. For more information refer to HE TLA.
Related Topics: AMADEUS LAST SEAT AVAILABILITY INDICATOR	A Slash indicator, (/), displayed before the Departure city indicates that the seat count you see is obtained in real time from the airline's inventory. The seat count shown for a class is the true number of seats left in that class.Ex MK, QF, SA, VS

<p>There is a functionality known as "Automated Ticketing Timelimit". This functionality enables the airlines to automatically assign and manage the timelimits for ticket issuance in Amadeus. The PNR contains two elements "OPW" and "OPC". OPW element notifies your office by queue placement 24 hours prior to the automatic cancellation of the AIR segments that are associated to an ATL. The "OPC" element is used to track the ticketing time limit, to initiate automatic cancellation of ATL associated segments and to queue place the PNR after cancellation. The queue category associated with Automated Ticketing Timelimit is Queue 1 and Category 7 and 8</p>			
<p>"AIRLINE OFFICES CAN ADD AN OPQ OPTION ELEMENT TO THE PNR SO THAT ON A SPECIFIED DATE, THE PNR IS PLACED ON THE QUEUE OF A DESIGNATED OFFICE. THE OPQ ELEMENT CAN ONLY BE ENTERED BY AUTHORIZED ATO/CTOS. IF YOU ENTER AN OPQ ELEMENT, THE PNR WILL BE SENT TO THE QUEUE PLANNER OF THE DESIGNATED OFFICE AT END OF TRANSACTION. ON THE SCHEDULED DATE, DURING THE NIGHTLY FILE MAINTENANCE PROCESS, THE PNR WILL BE PLACED ON THE QUEUE OF THE DESIGNATED OFFICE.</p>

HOTELS

HE HOTEL

There are 4 types of access levels that Amadeus provides for Hotel companies. The level of access is indicated in the availability display in the space between the hotel chain code and the hotel name

ACCESS LEVEL

DESCRIPTION

Dynamic Access	Indicated by a (!) in the availability display.This is the highest level of connectivity and links the Amadeus Central System with the hotel company's own reservation system. All availability and rates for the hotel chain are returned seamlessly from the hotel chain's own system. The hotel company responds with a confirmation and other information within four to eight seconds.
Hotel Complete Access Plus	Indicated by a (+) in the availability display. Information on the single property display is directly from the hotel chain's reservation system. Bookings are sent to the hotel chain via a high-speed communication link when the sale is made and the hotel system immediately returns the confirmation number and other data.

Hotel Complete Access	Indicated by a (/) in the availability display The information on the availability display comes from the distribution system. Bookings are processed like Complete Access Plus. A confirmation number is returned within four to eight seconds, even before you save the PNR.
Hotel Standard Access	Indicated by a blank space () in the availability display. Booking requests are sent to the hotel chain via teletype when you save your PNR. The hotel then updates your PNR with the confirmation number.
BEST AVAILABLE RATE (BAR) GUARANTEE	
The BAR indicator acts as a guarantee that the rates available in the distribution system are the best available public rates for Rack Rate, Non negotiated rates, Corporate Rates, Weekend Rates, Lowest Unrestricted Rates, Promotional Search Rates. The BAR is guaranteed by the hotel chain. In the event of a rate discrepancy, contact the hotel chain provider directly.

HOTEL PRICING		HE HP
<p>Hotel pricing is a display that you can request from a single property hotel availability display or from a hotel PNR segment. It is available for hotels in Amadeus Dynamic Access(DA) and Hotel Complete Access Plus(CA+)only. It provides detailed information for a specific room rate on the price and conditions associated to the room rate.The information on Hotel pricing displays is supplied directly from the hotel chain's own reservation system.</p>		
TO SEE HOTEL PRICING DETAILS FOR RATE AT LINE 1, COLOUMN A OF HOTEL SINGLE PROPERTY DISPLAY	HP1	
TO SEE HOTEL PRICING DETAILS FOR HOTEL AT SEGMENT 4 IN PNR	HP S4	
HOTEL RATE CHANGE		HE HR
<p>If the room rate changes in the period you are booking, it is indicated in a single property display with an asterisk (*) next to the availability status code. Check the hotel chain's policy on rate change by entering HE HTL XX (xx=hotel chain code).</p>		
<p>If the property belongs to an Amadeus Dynamic Access or Hotel Complete Access Plus chain, the HP x (where x = line number of the rate) entry performed on the single property display gets you the most up-to-date rate information. The information comes directly from the hotel chain's central reservation system.</p>		
<p>For Hotel Standard Access and Complete Access Hotels, the information about room rates is stored in the distribution system and is updated regularly by the hotel chain. To obtain room rate information, enter the hotel single property display and use the HR command to display hotel rate change information.</p>

HOTEL TERMS		HE HT
<p>Hotel Terms display is only available for Hotel Standard Access or Hotel Complete Access chains. A Hotel Terms display gives you the following information about a specific rate - what the rate includes, the cancellation policy, the booking requirements.</p>		
TO DISPLAY HOTEL TERMS FROM LINE 2 COLOUMN A OF SINGLE PROPERTY DISPLAY	HT 2	
TO DISPLAY HOTEL TERMS FROM SEGMENT 4 OF PNR	HT S4	
HOTEL POINTS OF REFERENCE		HE POR
<p>A Point of Reference is a building/monument or any other type of landmark considered important enough to be used as a criterion when searching for and booking hotels.Each point of reference is assigned to a category according to its nature. For example: An airport, a university, a sports stadium or a tourist attraction in a particular country.You can search for hotels that are less than a certain distance from the point of reference. In some countries partial geo coding is applied which means that, one or several areas of a country are including in POR but not the whole country.</p>

HOTEL MODIFICATIONS / CANCELLATION		HE HTL and then GP CHA
<p>Note: A change in the hotel segment may result in the segment getting cancelled and rebooked. There are 2 types of options, Critical and Non-Critical. For Complete Access and Complete Access Plus companies, when you enter a critical option, Amadeus tries to book a new segment. If the new request is accepted, the old segment is cancelled. If the new request is rejected, the old segment is retained. In the case of non-critical options, the new information is added to the existing reservation, the segment is modified, but not rebooked. Which options are Critical and which are Non - critical varies from company to company. To see which options are critical for a company, see HE HOTEL XX (where XX=Company code) The following options cannot be modified for Hotel Complete Access Plus chains: /RO- /RT- /SR- For Standard Access bookings, any change causes the old segment to be cancelled and a new one to be booked. You cannot modify or cancel a hotel segment if the guest has already checked in or if it is a past date segment.</p>		
TO CHANGE CHECK-IN DATE	5/ DT-9MAY	
TO CHANGE CHECK-OUT DATE	5/ DD-29MAY	
TO DELETE SEGMENT DATA, ENTER THE OPTION IDENTIFIER WITHOUT UPDATE TEXT	5/ SI-	
TO CANCEL A CONFIRMED HOTEL SEGMENT	XE 3 (Check the cancellation policy in RTSVCH display before cancelling the segment)	
<p>Note: If the hotel supports Interactive cancellation, a cancellation number is returned by the hotel provider and is appended to the hotel segment immediately. A remark with confirmation and cancellation number remains appended in the PNR on EOT. To see if the hotel chain supports Interactive Cancellation, check HE HTL XX</p>		
TO ADD A CANCELLATION POLICY MANUALLY TO THE HOTEL SEGMENT	4/ CXL-CANCEL BY 4PM	
TO DELETE AN INACTIVE SEGMENT / TO ACCEPT ALL STATUS CHANGES ON THE RETRIEVED PNR	DL3, ERK or ETK	
REMOVE ARRIVAL INFORMATION	6/ARR-	
CARS		HE CAR
<p>There are 3 types of access that Amadeus provides for car companies. The level of access is indicated in the availability display in the space between the car chain code and the car company name.</p>		
ACCESS LEVELS DESCRIPTION		
Complete Access Plus (Seamless)	The availability information is directly obtained from the providers system. The bookings are also sent via a high speed link at sell time. Represented by a (+) sign in the availability display	
Complete Access	Bookings are sent via a dedicated high-speed communication link at sell time. The car company returns a confirmation number and other data within 4-8 seconds after segment sell. Represented by a (/) in the availability display	
Standard Access	The booking is sent to the car company via a teletype link. The confirmation number is returned after End of Transaction. Represented by a blank space () in the availability display

CAR MODIFICATIONS	
CAR MODIFICATIONS	HE CAR and then GP CHA
For Car Standard Access Companies, any change causes the old segment to be cancelled and a new one to be booked. For complete access bookings which options cause a rebook varies between the Complete Access companies.If your changes cause the old segment to be cancelled, then the rebooking is only made if all the sale conditions are met. If they are not met, Amadeus ignores the change request but gives a new availability display based on the modified parameters, and an explanation of why the sale request was rejected. Check to see if the option you are modifying is a critical option. Critical options are those that affect the price of the booking.	
TO ADD OR MODIFY INFORMATION, ENTER THE SEGMENT NUMBER FOLLOWED BY THE OPTIONS WITH THE NEW OR MODIFIED INFORMATION	4/VT-ECAR (to modify the vehicle type requested)

AMADEUS SITES	
Amadeus online website for passenger travel information	www.checkmytrip.com
Amadeus online learning website	https://servicehub.amadeus.com/group/lms-central-learning
Amadeus training registration site (Click on the link for Training Registration)	www.amadeus.co.in
LIVE CHAT	
<p>Live Chat is an interactive facility whereby an agent can connect to the Amadeus 24*7 Helpdesk by activating the Live chat option on his Amadeus Selling Platform command page screen. The agent is immediately connected to one of the customer care agents at the Amadeus Help Desk, thereby eliminating any phone costs or waiting times.</p>	
AMADEUS LEARNING UNIVERSE	
<p>Amadeus Learning Universe is a solution with enhanced capabilities that will bring learning to your fingertips. It is a self-paced learning tool which is accessible anytime, anywhere, 24x7 through the following link: https://servicehub.amadeus.com/group/lms-central-learning</p>	

GENERAL DOS AND DONTs FOR RESERVATIONS

1. Do not use fictitious passenger names or speculative segments to block space.
2. Ensure passenger names are identical to travel documents and passports including complete first names.
3. Do not cancel an HL (waitlist) segment and rebook the same flight as hk (confirmed) in one transaction as it may cause reject in the airline system.
4. Do not cancel and rebook segments for the purpose of extending the airline's time limit as it is considered a system abuse by carrier and may result in a pnr cancellation by the carrier.
5. Do not override minimum connecting time warnings generated by the system at end transaction.
6. Remove all inactive segments with status codes HX/NO/UC/UN with 'erk or etk' entry and not with 'xe' entry.
7. Always advise the ticket time limits to the carrier through an OSI message.
8. Do not insert duplicate ticket numbers in ssr/osi, if FA/FH element already exist.
9. Do not make any modifications to a pnr in the same transaction as a split. Ensure you have received the record locator in the new PNR and only then proceed for any modifications.
10. Do not use any of these special characters or symbols (. ; : # \$) In ap, osi and ssr fields in the pnr. They are not recognized by the airline systems; hence they can be rejected upon transmission.
11. Contact numbers should be put in the OSI field.
12. Do not re-use an inactive pnr which has expired or has been cancelled for any reason. Instead of this the RRP entry can be used to copy the passenger's data to create a new PNR.
13. Use the direct access availability display to book a seat on the airline participating in direct access (*) level.
14. Do not use the sb entry to rebook flights originally booked in standard access. Cancel and rebook in 2 transactions is recommended.
15. Do not cancel and rebook a hotel segment if a confirmation number is pending.
16. Do not ignore a (hotel) reservation or change it before end of transaction, as it is still a valid transaction in the hotel system.
17. In case there is a need to modify an existing hotel segment, please check hehtlxx, under critical options.
18. In case the check in is within 24 hours, the travel agent should also check with the property directly regarding any modifications made.
19. Before cancelling a segment always check the cancellation policy of the property. The most accurate cancellation policy is returned by doing rtsvch3 where 3 is the hotel segment number in the PNR.
20. After cancellation make sure a cx message is returned in your PNR.
